

# Extended Syllabus

(2024 Spring)

Course Title	Basic Machine Learning	Course Number	CSE4130-02
Credit	3	Enrollment Eligibility	Junior
Class Time	Tue/Thurs, 09:00-10:15	Classroom	TBA

	Name: Junsuk Choe	Homepage: <a href="https://sites.google.com/site/junsukchoe/">https://sites.google.com/site/junsukchoe/</a>
	E-mail: jschoe@sogang.ac.kr	Telephone: 02-705-8495
	Office: AS-913 Office Hours: Mon, Wed (13:00-15:00) or by appointment.	

## I. Course Overview

1. Description							
We will study basic machine learning techniques such as linear regression, dimensionality reduction, density estimation, and classification. For the comprehensive understanding of such machine learning topics, we will also study basic mathematics including linear algebra, analytic geometry, matrix decomposition, vector calculus, probability distributions, and continuous optimization. This course will help you build a good foundation for studying machine learning related topics such as computer vision and natural language processing.							
2. Prerequisites							
Minimum: Calculus Preferred: Calculus, Linear Algebra, Probability, Statistics							
3. Course Format (%)							
Lecture	Discussion	Experiment/Practicum	Field study	Presentations	Other		
100 %	%	%	%	%	%		
4. Evaluation (%)							
mid-term Exam	Final exam	Quizzes	Presentations	Projects	Assignments	Participation	Other
40 %	40 %	%	%	%	20 %	%	%

## II. Course Objectives

- Understanding four basic machine learning topics.
- Understanding basic mathematics for comprehensive understanding of machine learning topics.

### III. Course Format

(\* In detail)

**Modality:**

In-person.

**Language:**

The lecture will be given in English.

### IV. Course Requirements and Grading Criteria

Midterm : 40%

Final : 40%

Assignments : 20%

This course will have zero tolerance with any cheating activities. All source codes submitted will be copy-checked.

### V. Course Policies

**Attendance and Work:** All students should attend class unless discussed with the instructor.

**Honor code:** Students are encouraged to discuss assignments with other students or professor. However, plagiarism and exam cheating are unacceptable in any academic environment. If your assignment or exam is identified as plagiarism, it will get 0 point.

### VI. Materials and References

**Textbook.**

Deisenroth, Marc Peter, A. Aldo Faisal, and Cheng Soon Ong. Mathematics for machine learning. Cambridge University Press, 2020.

**References.**

Kevin P. Murphy, Probabilistic machine learning: an introduction. MIT press, 2022.

Christopher M. Bishop, and Nasser M. Nasrabadi. *Pattern recognition and machine learning*. Springer, 2006.

### VII. Course Schedule (Subject to change)

Week 1	Learning Objectives	Understand linear algebra (1)
	Topics	Linear algebra
	Class Work	Lecture

	(Methods)	
	Materials (Required Readings)	PPT
	Assignments	None
Week 2	Learning Objectives	Understand linear algebra (2)
	Topics	Linear algebra
	Class Work (Methods)	Lecture
	Materials (Required Readings)	PPT
	Assignments	
Week 3	Learning Objectives	Understand analytic geometry
	Topics	Analytic geometry
	Class Work (Methods)	Lecture
	Materials (Required Readings)	PPT
	Assignments	
Week 4	Learning Objectives	Understand matrix decomposition
	Topics	Matrix decomposition
	Class Work (Methods)	Lecture
	Materials (Required Readings)	PPT
	Assignments	
Week 5	Learning Objectives	Understand vector calculus
	Topics	Vector Calculus
	Class Work (Methods)	Lecture

	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 6</b>	<b>Learning Objectives</b>	Understand probability and distributions (1)
	<b>Topics</b>	Probability and Distributions
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 7</b>	<b>Learning Objectives</b>	Understand probability and distributions (2)
	<b>Topics</b>	Probability and Distributions
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 8</b>	<b>Learning Objectives</b>	Midterm Exam
	<b>Topics</b>	
	<b>Class Work (Methods)</b>	
	<b>Materials (Required Readings)</b>	
	<b>Assignments</b>	
<b>Week 9</b>	<b>Learning Objectives</b>	Understand optimization (1)
	<b>Topics</b>	Optimization
	<b>Class Work (Methods)</b>	Lecture

	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 10</b>	<b>Learning Objectives</b>	Understand optimization (2)
	<b>Topics</b>	Optimization
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 11</b>	<b>Learning Objectives</b>	Understand basic concept of machine learning
	<b>Topics</b>	When Models Meet Data
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 12</b>	<b>Learning Objectives</b>	Understand dimensionality reduction
	<b>Topics</b>	Dimensionality Reduction
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 13</b>	<b>Learning Objectives</b>	Understand density estimation
	<b>Topics</b>	Density Estimation
	<b>Class Work (Methods)</b>	Lecture

	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 14</b>	<b>Learning Objectives</b>	Understand classification
	<b>Topics</b>	Classification with Support Vector Machines
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 15</b>	<b>Learning Objectives</b>	Understand machine learning
	<b>Topics</b>	Remaining topics in the textbook
	<b>Class Work (Methods)</b>	Lecture
	<b>Materials (Required Readings)</b>	PPT
	<b>Assignments</b>	
<b>Week 16</b>	<b>Learning Objectives</b>	Final exam
	<b>Topics</b>	
	<b>Class Work (Methods)</b>	
	<b>Materials (Required Readings)</b>	
	<b>Assignments</b>	

#### VIII. Aid for the Challenged Students

Challenged students are encouraged to make an individual meeting at the beginning of the semester with the instructor to request any help during the course.
